

SYNTHETIC / DEMO — 合成データによる見本です。実在の顧客ではありません。 This is a sample built from synthetic data; it is not a customer engagement.

Software / Agent Package Delivery Document — SAMPLE (synthetic data)

Mirai Move API

Report ・ レポート	Software / Agent Package Delivery Document — SAMPLE (synthetic data)
Product ・ 製品	Mirai Move API / Mirai Move API
Prepared for ・ 宛先	Sample organization (SYNTHETIC SAMPLE)
Version ・ 版	v1 ・ compiled 2026-09-01 ・ released 2026-09-01
Reference ・ 参照	MM-WD-SAMPLE0000000000 ・ SOFTWARE_PACKAGE_DELIVERY ・ mm-ddv1-deliverable-compiler/1.0.0
Review ・ 確認	compiled not reviewed ・ state released
Evidence basis ・ 根拠	0 passages ・ 4 sources ・ stale ・ latest 2026-05-02 ・ contradictions none
Classification ・ 区分	customer private tenant ・ SYNTHETIC
Case	サンプル市：路線減便後の高齢者の移動アクセス（合成データ） (founder review, v1)

Decision this document serves ・ この文書が支える意思決定
Mirai Move の読み取り API パッケージを自組織のシステムに統合するか（合成データ）

この成果物が扱う判断 The decision this addresses

何を決めようとしているか ・ What decision is being made?

- 事実 ・ fact** Mirai Move の読み取り API パッケージを自組織のシステムに統合するか（合成データ） (the requester's own words)
- 事実 ・ fact** Geography stated by the requester: Sample City (synthetic) (customer-provided)
- 事実 ・ fact** User group stated by the requester: 75歳以上の住民 (customer-provided)
- 事実 ・ fact** Intended use stated by the requester: 議会向け予算説明 (customer-provided)

パッケージ内容と契約 Package contents and contract

何が含まれ、どの契約に基づくか ・ What is included, under what contract versions?

- 事実 ・ fact** API contract v1 ・ OpenAPI digest 7b5f61d69207bcab… (the canonical customer contract)
- 事実 ・ fact** mirai-move-sdk-ts-1.0.0.tgz — typescript-npm-package v1.0.0 (sha256 3d2e8cab3d66ba61…)
- 事実 ・ fact** mirai_move_sdk-1.0.0-py3-none-any.whl — python-wheel v1.0.0 (sha256 1c03df5639a08275…)
- 事実 ・ fact** mirai-move-sdk-source-1.0.0.zip — source-archive v1.0.0 (sha256 40611d1d0cb6fad5…)

データ境界とセキュリティモデル Data boundary and security model

どのデータが、どの境界で扱われるか・What data crosses what boundary, and how is it secured?

1. 事実・fact The package consumes the governed Mirai Move read API only: released deliverables, Cases, evidence, matches, solution gaps and monitoring, within the credential's scopes and classification ceiling. (data boundary)
 2. 事実・fact No customer data leaves the customer's systems through the SDK beyond the API requests it makes; the SDK stores nothing. (data boundary)
 3. 事実・fact No internal infrastructure, provider integration or internal source code is part of any customer package. (data boundary)
 4. 事実・fact Authentication is a bearer credential issued under governed human approval; there is no self-service key issuance. (security model)
 5. 事実・fact Credentials are never embedded in any artifact; every published artifact is secret-scanned as built bytes. (security model)
 6. 事実・fact All access is read-only; write, outreach and payment functions are not part of the API contract. (security model)
 7. 事実・fact Every request, including refusals, is audited server-side with durable rate limiting. (security model)
 8. 事実・fact SDK artifacts target API contract v1; a contract change ships as a new artifact version with an updated digest. (compatibility)
 9. 事実・fact TypeScript SDK: Node.js 18+ (fetch-based, zero runtime dependencies). (compatibility)
 10. 事実・fact Python SDK: Python 3.9+ (urllib-based, zero runtime dependencies). (compatibility)
-

統合ガイドの範囲 Integration guidance

どう統合するか・How is it integrated?

1. 推奨・recommendation 読み取り専用クライアントとして自組織の分析基盤に組み込む（合成データ・レビュー担当者の記載例） (authored by the reviewer (sample reviewer))
-

サポート境界と限界 Support boundary and limitations

何がサポートされ、何がされないか・What is supported, and what is not?

1. 推奨・recommendation 契約 v1 の範囲で仕様上の質問に回答する（実装作業は含まない）（合成データ・レビュー担当者の記載例） (authored by the reviewer (sample reviewer))
-

分かっていること Unknowns

何が不完全か・What evidence is incomplete?

1. 不明・unknown Missing evidence class: FUNDING_PATHWAY (named by the qualification engine)
2. 不明・unknown Missing evidence class: OPERATOR_CAPACITY (named by the qualification engine)
3. 推奨・recommendation Bounded research task FUNDING_PATHWAY: sample city DRT subsidy programme (OPEN) (public-source only; nobody is contacted)

次の安全な一手 Next safe action

外部行動なしに進められる次の一手は何か・What is the next action that commits nothing externally?

INCOMPLETE — this section is written by the reviewer before release; the compiler does not invent recommendations

Limitations・制約:

- 1 of 7 sections are INCOMPLETE or GATED and say why
- no statement is verified beyond its evidence class; supplier-provided facts remain supplier-provided
- absence of evidence is not evidence of absence

This document does not claim・主張しないこと:

- no customer relationship, revenue, adoption, satisfaction or success is implied by delivery, access or acceptance; unverified statements are marked as such
- no customer receives internal infrastructure source code; no credential is ever embedded in a package

Methodology: Public-source discovery → evidence extraction with provenance → candidate qualification → Case formation → match evaluation against recorded constraints → human review. Every statement carries FACT / INFERENCE / HYPOTHESIS / RECOMMENDATION / UNKNOWN and its evidence ids; sections the substrate cannot support are marked INCOMPLETE, never filled.

Distribution: prepared for the named organization; internal use; no redistribution; unverified items are marked・**License:** 社内利用限定・再配布不可・未検証事項明示 / internal use, no redistribution, unverified items marked
